## INTRODUCTION

The PLANET 5p PROJECT started in August 2019 with the aim to create the global community of the Syndrome 5p- individuals, families and professionals, and to promote awareness of the syndrome. We work to promote an interdisciplinary and longitudinal research approach in the entire world.

Planet 5p is a non-profit network of families, professionals and research institutions around the world. Planet 5p belongs to nobody and to each one of the 5p- families around the world.

## CURRENT SITUATION

**COUNTRIES CONTACTED:** Argentina, Austria, Belgium, Brazil, Colombia, Cuba, Costa Rica, Chile, China, Ecuador, El Salvador, Germany, Guatemala, Holland, Iceland, Indonesia, Italy, Japan, Kazakhstan, Morocco, Mexico, Panama, Paraguay, Peru, Russia, Spain, Switzerland, Turkey, United Kingdom, USA

## OBJECTIVES

- To make a world census of 5P- individuals
- To foster cooperation between researchers around the world
- To offer a worldwide network as support for isolated families
- To disseminate scientific knowledge among the global medical community
- To identify, promote and generalize diagnostic and intervention protocols worldwide
- To raise awareness around the syndrome among society
- To update the online information and description about the syndrome
- To promote legislation related to diagnosis, evolution, integration, social and economic protection, and other concerns for 5p- individuals and their families
